NJ NSGP Target Hardening Equipment Authorized Equipment List

03OE-03-MEGA: System, Public Address. Handheld or Mobile systems used for mass audio notification. This can include vehicle-mounted high powered speaker systems, or battery powered megaphone / public address systems with corded microphone.

04AP-05-CRED: System, Credentialing. Software application with associated hardware and material for creating site/event credential badges and controlling scene access. This functionality may also be obtainable via subscription as a cloud-based service, as opposed to purchasing software

04AP-09-ALRT: Systems, Public Notification and Warning systems used to alert the public of protective actions or to provide warning to the public in the event of an incident, such as sirens, the Emergency Alert System (EAS), the Integrated Public Alert and Warning System (IPAWS), and Wireless Emergency Alerts (WEA).

04AP-11-SAAS: Applications, Software as a Service. Sometimes referred to as "on-demand software", SAAS applications would run on provided servers, delivering functionality via the internet to any device having connectivity and the required browser or interface. Some example SAAS applications include equipment tracking and maintenance, intra-application communication among client devices, and specialized software such as plume modeling. Note that purchasers of SAAS should consider the security aspects of the planned usage, particularly availability and the protection of sensitive information stored remotely.

05AU-00-TOKN: System, Remote. Authentication system used to provide enhanced remote authentication, usually consisting of a server, some synchronization scheme, and a device, token, or smartphone application.

05EN-00-ECRP: Software, Encryption. Consider Encryption software for protecting stored data files or email messages.

05HS-00-MALW: Software, Malware/Anti-Virus Protection software for protection against viruses, spyware, and malicious code. May be obtained for individual hosts or for entire network segments.

05HS-00-PFWL: System, Personal Firewall. Personal firewall for operation on individual workstations. Usually a software solution, but appliances are also available.

05NP-00-FWAL: Firewall, Network firewall (software or standalone appliance) for use in protecting networks.

05NP-00-IDPS: System, Intrusion Detection/Prevention. Intrusion Detection and/or Prevention. This system is deployed at either host or network level to detect and/or prevent unauthorized or aberrant behavior on the network

06CC-02-PAGE: Services/Systems. Paging services/systems, 1-way text messaging.

06CP-01-PORT: Radio, Portable. Individual/portable radio transceivers.

06CP-03-ICOM: Intercom. System for hands-free (wired or wireless) communication for limited numbers of personnel in close proximity, such as vehicle crew members. Includes systems designed for underwater use.

06CP-03-PRAC: Accessories, Portable Radio. Speaker/microphone extensions to portable radios. Sometimes used within encapsulated/partially encapsulated suits, where restricted access to radio equipment impedes normal portable radio operations. Also includes programming/cloning cables.

10GE-00-GENR: Generators. Generators of varying types and sizes, including gasoline, diesel, propane, natural gas, alternator, gas turbine powered devices, etc.

13IT-00-ALRT: System, Alert/Notification. Alert and notification equipment that allows for real-time dissemination of information and intelligence among responders via equipment such as cellular phones, pagers, text messaging, etc. This functionality may also be obtainable via subscription as a cloud-based service using a web browser interface or a mobile app, as opposed to local software.

14CI-00-COOP: System, Information Technology Contingency Operations. Includes back-up computer hardware, operating systems, data storage, and application software necessary to provide a working environment for contingency operations. May be a purchased remote service or a dedicated alternate operating site.

14EX-00-BCAN: Receptacles, Trash, Blast-Resistant. Blast-resistant trash receptacles.

14EX-00-BSIR: Systems, Building, Blast/Shock/Impact Resistant. Systems to mitigate damage from blasts, shocks, or impacts, such as column and surface wraps, wall coverings, breakage/shatter resistant glass, window wraps, and deflection shields.

14SW-01-ALRM: Systems/Sensors, Alarm. Systems and standalone sensors designed to detect access violations or intrusions using sensors such as door/window switches, motion sensors, acoustic sensors, seismic, and thermal sensors. May also include temperature sensors for critical areas.

14SW-01-DOOR: Doors and Gates, Impact Resistant. Reinforced doors and gates with increased resistance to external impact for increased physical security.

14SW-01-LITE: Lighting, Area, Fixed. Fixed high-intensity lighting systems for improved visibility in areas such as building perimeters and surveillance zones.

14SW-01-PACS: System, Physical Access Control. Locking devices and entry systems for control of physical access to facilities.

14SW-01-SIDP: Systems, Personnel Identification. Systems for positive identification of personnel as a prerequisite for entering restricted areas or accessing information systems. This functionality may also be obtainable via subscription as a cloud-based service using a web browser interface or a mobile app, as opposed to purchasing software.

14SW-01-SIDV: Systems, Vehicle Identification. Systems for identification and tracking of vehicles, ranging from decals to radio frequency identification (RFID) or other transponder or GPS-based devices. This functionality may also be obtainable via subscription as a cloud-based service using a web browser interface or a mobile app, as opposed to local software .Such services could use specialized vehicle sensors or reporting capabilities already built into the vehicle.

14SW-01-SNSR: Sensors/Alarms, System and Infrastructure Monitoring, Standalone. Standalone sensors/alarms for use on critical systems or infrastructure items (security systems, power supplies, etc.) to provide warning when these systems fail or are near failure.

14SW-01-VIDA: Systems, Video Assessment, Security. Camera-based security systems utilizing standard, low light, or infrared technology. This functionality may also be obtainable via subscription as a cloud-based service using a web browser interface or a mobile app, with imagery stored in the cloud as opposed to local software and storage.

14SW-01-WALL: Barriers: Fences; Jersey Walls. Obstacles designed to channel or halt pedestrian or vehicle-borne traffic to protect a physical asset or facility.

15SC-00-PPSS: Systems, Personnel/Package Screening. Hand-held or fixed systems such as walk-through magnetometers and conveyor-belt x-ray systems used to screen personnel and packages for hazardous materials/devices.
