

June 28, 2018

The Honorable Alex Azar
Secretary
Department of Health and Human Services
200 Independence Avenue, S.W.
Washington, DC 20201

Dear Secretary Azar:

We, the undersigned groups, who supported enactment of the bipartisan Recognize, Assist, Include, Support, and Engage (RAISE) Family Caregivers Act (P.L. 115-119), write to urge immediate and effective implementation of this law to help better recognize and support our country's family caregivers. This is an issue that affects just about everyone. Most individuals are, have been, or will be a family caregiver or will need the help of one in the future.

Family caregivers are the backbone of services and supports in this country – they help loved ones of all ages live independently in their homes and communities where they want to be, helping to save taxpayer dollars by delaying and preventing more costly care and unnecessary hospitalizations. About 40 million family caregivers provide about \$470 billion annually in unpaid care to their loved ones. About 3.7 million family caregivers provide care to a child under age 18 because of a medical, behavioral, or other condition or disability, and 6.5 million family caregivers assist both adults and children. Our country relies on the contributions family caregivers make and should recognize and support them. Family caregivers help with daily tasks such as eating, bathing, dressing, transportation, medical/nursing tasks such as managing multiple medications, managing finances, coordinating services, and much more. In doing so, they take on physical, emotional, and financial challenges.

The RAISE Family Caregivers Act requires the Secretary of Health and Human Services to develop a strategy to support family caregivers within 18 months of enactment. The law establishes an advisory council to bring together representatives from both the private and public sectors to advise and make recommendations. The law outlines specific timetables for action and deliverables. The strategy would identify recommended actions that communities, providers, government, and others are taking and may take to recognize and support family caregivers. The law would implement the federal Commission on Long-Term Care's bipartisan recommendation that Congress require the development of a strategy to support family caregivers and is consistent with a 2016 recommendation by the National Academies of Sciences, Engineering, and Medicine calling for a family caregiver strategy.

We are so pleased that this legislation passed Congress with strong bipartisan support and was signed into law by the President. Now, your leadership is important to the law's successful implementation. We urge you to move forward with prompt implementation of the law. We stand ready to work with you and assist with implementation, and we appreciate your prompt attention to this important issue. Millions of individuals count on

family caregivers every day. Family caregivers are counting on implementation of this commonsense law.

Feel free to have your staff contact Rhonda Richards on AARP's Government Affairs staff at r-richards@arp.org or 202-434-3791 if you have any questions or need any additional information. Thank you for your consideration and we look forward to working with you to support our nation's family caregivers.

Sincerely,
