11:00 am - 12:00 pm

- Myers-JDC-Brookdale Forum

One out of six children in Israel are children at risk. This means that they are in danger in their own homes, engage in risk behaviors, or have educational, emotional, or social problems. The Myers-JDC-Brookdale Institute has been central in transforming the way that Israel cares for these children — from training professionals, to evaluating programs, to building a national data-based system to address the needs of children in every community in Israel. Today, what has become the National Program for Children and Youth at Risk continues to rely on MJB's ongoing expertise to ensure quality social services nationwide. Join our MJB Open Forum and learn how together we improve the lives of Israel's most vulnerable children.

- Taub Center Forum

The coronavirus crisis has forced many businesses in Israel and all over the world to adopt a model that allows remote work. This forum will reveal findings from a newly published Taub Center study conducted by researchers Shavit Madhala and Professor Benjamin Bental analyzing the characteristics that are aiding Israeli workers' ability to work from home, as well as those that make remote work less likely – and what can be done to address the widening gaps between workers in Israel's labor market.
